Archimedes of Syracuse

Greek mathematician, philosopher and inventor who wrote important works on geometry, arithmetic and mechanics.

In mathematics he prove a range of geometrical theorems, including the area of a circle, the surface area, and volume of a sphere.

In mechanics he defined the principle of the lever and the hydraulic screw for raising water from a lower to higher level. He is most famous for discovering the law of hydrostatics, stating that a body immersed in fluid loses weight equal to the weight of the amount of fluid it displaces
